4" Stainless Steel Submersibles

QUICK LINK

> [Grundfos Submersible MS Motors](#)

FEATURES

- All Stainless Steel construction for increased durability and reliability
- No lead-leaching components for maximum safety and health of end-users
- Built-in sand bearing minimizes sand damage experienced in most other submersible pumps and increases pump life, as well as offering protection against upthrust
- Built-in, jam-free check valves guarantee smooth running, fail safe operation
- User-friendly cable guard for the easiest installation among submersible pumps

PERFORMANCE

4-in Submersible Performance
